

mlgcomplete

natural. safe. supported.

With Tides Medical and MLG-Complete, you can be confident in the effective, naturally occurring components of birth tissue products and feel supported with personalized reimbursement assistance from our team.

MLG-Complete is...

Full Thickness

Minimally manipulated and processed graft that retains all the layers of the placental covering.

Minimally Processed

No harsh mechanical and chemical washes prior to sterilization preserving the naturally occurring collagen and glycosaminoglycan content.

Safe

Tissue acquired from donors is screened before and after giving birth and compliant with FDA regulations and AATB Standards.

Easy to use

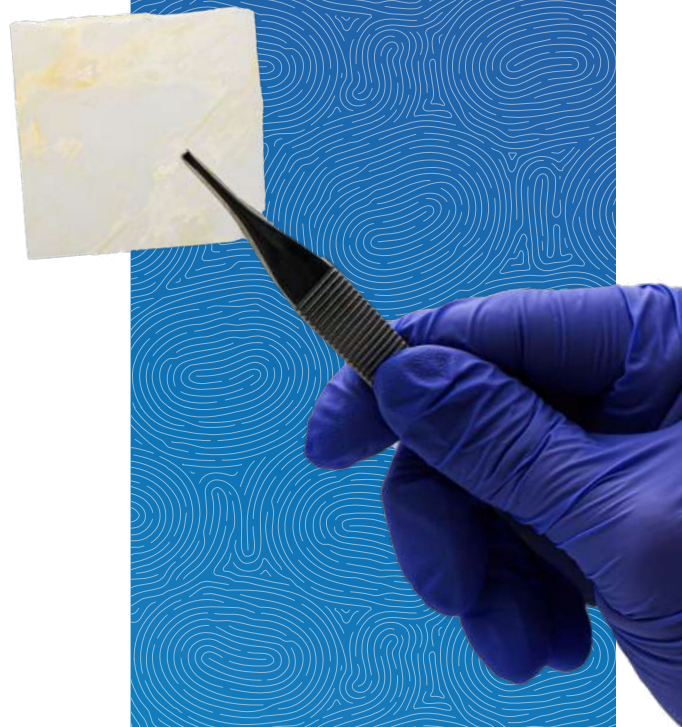

Full thickness allows for handling ease and can be stored at room temperature for up to 5 years from the date of manufacturing.
